Anal Dysplasia Treatment
Consent Form

Patient Name: _____ Date of Birth: _____

Guardian Name (if applicable): _____ Patient ID: _____

Washington State law guarantees that you have both the right and the obligation to make decisions regarding your health care. Your physician can provide you with the necessary information and advice, but as a member of the health care team, you must participate in the decision making process. This form acknowledges your consent to treatment recommended by your physician.

1 MY PROCEDURE

I hereby give my consent for Dr. _____ to perform **High resolution anoscopy and ablation of dysplastic anal tissue with Infrared Coagulation** upon me. I understand the procedure is to be performed at the First Hill Surgery Center. This has been recommended to me by my physician in order to treat Anal Dysplasia**.**

I understand that the procedure or treatment can be described as follows:
High Resolution Anoscopy (HRA) involves inspection of the anus under a microscope after application of acetic acid (vinegar) solution and Lugol's (iodine) solution. Acetic acid and Lugol's solution cause characteristic changes in dysplastic (abnormal) tissue. These changes will guide in determining which area to biopsy and ablate.

Ablation of dysplastic epithelium will be performed with an Infrared Coagulator (IRC). This device delivers short pulses of infrared light to the targeted tissue, causing thermal coagulation (burning) of the abnormal tissue.

Local anesthetic is required for this procedure. You may experience some discomfort during this procedure but it is typically well tolerated.

2 MY BENEFITS

Some potential benefits of this procedure include:

- Decreased risk of progression to anal cancer. PLEASE NOTE: THIS PROCEDURE DOES NOT GUARANTEE THAT YOU WILL NOT DEVELOP ANAL CANCER.

3 MY RISKS

I understand that there are **potential risks, complications and side effects** associated with any surgical procedure. Although it is impossible to list all of them, I have been informed of some of the possible risks, complications and side effects of this procedure.

These could include but may not be limited to the following:

- bleeding, both immediate or delayed, possibly requiring re-operation; infection at the surgical site, possibly requiring further treatment and/or surgery; post-operative pain, both acute and chronic; recurrent symptoms; recurrent dysplasia; injury to the sphincter muscles causing temporary or permanent incontinence; narrowing of the anal canal leading to stenosis; progression to anal cancer.

Some of these risks, complications and side effects are not serious or do not happen frequently. Although these risks, complications and side effects may occur only very rarely, they do sometimes occur and cannot be predicted or prevented by the physician performing the procedure.

***Please inform us if you have a history of photosensitivity or are on any medications that may cause photosensitivity.**

4 **MY CONSENT**

Although most procedures have good results, I understand that **no guarantee** has been made to me about the results of this procedure or the occurrence of any risks, complications and side effects.

I recognize that during the course of treatment, unforeseeable conditions may require **additional treatment or procedures**.

I request and authorize my physician and other qualified medical personnel to perform such treatment or procedures **as required**.

I have chosen to undergo this procedure after considering the **alternative forms of diagnosis and/or treatment** for my condition including no treatment or other procedures or tests. Alternatives to this procedure may include, but are not limited to other surgical techniques. These alternative forms of treatment have their own potential risks, benefits and possible complications.

I certify that I have read or had read to me the contents of this form and will follow any patient instructions related to this procedure.

I understand the potential risks, complications and side effects involved with the proposed **Anal Dysplasia treatment** and have decided to proceed after considering the possibility of both known and unknown risks, complications, side effects and alternatives.

I have had the opportunity to ask questions and all of my questions have been answered to my satisfaction. I consent to the above procedures as deemed necessary or appropriate by my physician or credentialed provider.

Patient Signature: _____ Date: _____ Time: _____

Patient is unable to consent because _____. I therefore consent for the patient.
Authorized Consenter's Signature: _____ Date: _____ Time: _____
