

## Septoplasty Consent Form

Patient Name:

Date of Birth: \_\_\_\_\_

Guardian Name (if applicable):

Patient ID: \_\_\_\_\_

Washington State law guarantees that you have both the right and the obligation to make decisions regarding your health care. Your physician can provide you with the necessary information and advice, but as a member of the health care team, you must participate in the decision making process. This form acknowledges your consent to treatment recommended by your physician.

**1 MY PROCEDURE**

I hereby give my consent for Dr. \_\_\_\_\_ to perform a **Septoplasty** upon me. I understand the procedure is to be performed at First Hill Surgery Center. This has been recommended to me by my physician in order to **diagnose and/or treat breathing problems associated with a deviated septum.**

I understand that the procedure or treatment can be described as follows:  
**In an outpatient setting, a thin, lighted instrument (endoscope) will be inserted into the nasal passages to determine the shape of your septum. Working through the nostrils, the midline “party wall” will be straightened to unblock the nasal passage. Packing is generally recommended the day of the surgery and may be removed the following day at your doctor’s discretion.**

**Typical recovery times include up to 7-10 days off from all usual activities.**

This procedure requires general anesthesia which will be administered by a qualified anesthesiologist. Your anesthesiologist will be available to discuss this further with you on the day of your procedure.

**2 MY BENEFITS**

**Some potential benefits of this procedure include:**

- Improved breathing, decreased sleep apnea

**3 MY RISKS**

*I understand that there are **potential risks, complications and side effects** associated with any surgical procedure. Although it is impossible to list all of them, I have been informed of some of the possible risks, complications and side effects of this procedure.*

**These could include but may not be limited to the following:**

- Bleeding, bleeding requiring a return trip to the operating room, development of a septal perforation, failure of the nasal obstruction to entirely resolve, loss of nasal support or formation of new nasal complaints.

Some of these risks, complications and side effects are not serious or do not happen frequently. Although these risks, complications and side effects may occur only very rarely, they do sometimes occur and cannot be predicted or prevented by the physician performing the procedure.

**4 MY CONSENT**

Although most procedures have good results, I understand that **no guarantee** has been made to me about the results of this procedure or the occurrence of any risks, complications and side effects.

I recognize that during the course of treatment, unforeseeable conditions may require **additional treatment or procedures**.

I request and authorize my physician and other qualified medical personnel to perform such treatment or procedures **as required**.

I have chosen to undergo this procedure after considering the **alternative forms of diagnosis and/or treatment** for my condition including no treatment or other procedures or tests. Alternatives to this procedure may include, but are not limited to non-surgical options such as topical steroid spray, external nasal strips, and antibiotics for infection. These alternative forms of treatment have their own potential risks, benefits and possible complications.

**I certify that I have read or had read to me the contents of this form and will follow any patient instructions related to this procedure.**

I understand the potential risks, complications and side effects involved with the proposed **Septoplasty** and have decided to proceed after considering the possibility of both known and unknown risks, complications, side effects and alternatives.

I have had the opportunity to ask questions and all of my questions have been answered to my satisfaction. I consent to the above procedures as deemed necessary or appropriate by my physician or credentialed provider.
