

**Laparoscopic  Umbilical  Ventral  Epigastric  Incisional  
Hernia Repair Consent Form**

Patient Name:  Date of Birth:

Guardian Name (if applicable):  Patient ID:

Washington State law guarantees that you have both the right and the obligation to make decisions regarding your health care. Your physician can provide you with the necessary information and advice, but as a member of the health care team, you must participate in the decision making process. This form acknowledges your consent to treatment recommended by your physician.

**1 MY PROCEDURE**

I hereby give my consent for Dr. \_\_\_\_\_ to perform a **laparoscopic  Umbilical  Ventral  Epigastric  Incisional hernia repair** upon me. I understand the procedure is to be performed at First Hill Surgery Center. This has been recommended to me by my physician in order to diagnose and/or treat  Umbilical  Ventral  Epigastric  Incisional hernia.

I understand that the procedure or treatment can be described as follows:  
**Placement of a camera and ports through small incisions in the abdominal wall with inflation of the abdominal cavity. The hernia is reduced and the defect (hernia) repaired via the small incisions. Repair of the hernia may utilize either sutures, tacks, mesh or all three. Your surgeon will pick the appropriate repair based on symptoms and the size of the hernia.**

This procedure requires general anesthesia which will be administered by a qualified anesthesiologist. Your anesthesiologist will be available to discuss this further with you on the day of your procedure.

**2 MY BENEFITS**

**Some potential benefits of this procedure include:**

- Reduced risk of incarceration or obstruction due to the hernia; reduced pain associated with the hernia, improved appearance of the area of the hernia

While a laparoscopic  Umbilical  Ventral  Epigastric  Incisional hernia repair is often an effective treatment for  Umbilical  Ventral  Epigastric  Incisional hernia, not all conditions, diseases or problems of the groin can be diagnosed or treated solely by laparoscopic surgical repair.

**3 MY RISKS**

I understand that there are **potential risks, complications and side effects** associated with any surgical procedure. Although it is impossible to list all of them, I have been informed of some of the possible risks, complications and side effects of this procedure.

**These could include but may not be limited to the following:**

- Conversion to an open (incision) repair; bleeding; infection (either of wound or mesh if used); recurrence of the hernia; post-operative pain; post-operative swelling; accumulation of fluid at surgery site (hematoma or seroma); numbness in incision site;

pain in incision site (temporary or permanent); undesired appearance of the wound after surgery; inadvertent or unexpected injury to intrabdominal contents; formation of intrabdominal adhesions.

Some of these risks, complications and side effects are not serious or do not happen frequently. Although these risks, complications and side effects may occur only very rarely, they do sometimes occur and cannot be predicted or prevented by the physician performing the procedure.

**4 MY CONSENT**

Although most procedures have good results, I understand that **no guarantee** has been made to me about the results of this procedure or the occurrence of any risks, complications and side effects.

I recognize that during the course of treatment, unforeseeable conditions may require **additional treatment or procedures**.

I request and authorize my physician and other qualified medical personnel to perform such treatment or procedures **as required**.

I have chosen to undergo this procedure after considering the **alternative forms of diagnosis and/or treatment** for my condition including no treatment or other procedures or tests. Alternatives to this procedure may include, but are not limited to open surgical repair, delayed repair, observation without surgery, and compressive binder. These alternative forms of treatment have their own potential risks, benefits and possible complications.

**I certify that I have read or had read to me the contents of this form.**

I have read or had read to me and will follow any patient instructions related to this procedure.

I understand the potential risks, complications and side effects involved with the proposed **laparoscopic**  **Umbilical**  **Ventral**  **Epigastric**  **Incisional hernia repair** and have decided to proceed after considering the possibility of both known and unknown risks, complications, side effects and alternatives.

I have had the opportunity to ask questions and all of my questions have been answered to my satisfaction. I consent to the above procedures as deemed necessary or appropriate by my physician or credentialed provider.
