

## Hysteroscopy (Operative) Consent Form

Patient Name: \_\_\_\_\_ Date of Birth: \_\_\_\_\_

Guardian Name (if applicable): \_\_\_\_\_ Patient ID: \_\_\_\_\_

Washington State law guarantees that you have both the right and the obligation to make decisions regarding your health care. Your physician can provide you with the necessary information and advice, but as a member of the health care team, you must participate in the decision making process. This form acknowledges your consent to treatment recommended by your physician.

**1 MY PROCEDURE**

I hereby give my consent for Dr. \_\_\_\_\_ or his/her associates to perform a **Hysteroscopy (operative)** upon me. I understand the procedure is to be performed at First Hill Surgery Center. This has been recommended to me by my physician in order to **diagnose or treat dysfunctional uterine bleeding, menorrhagia (heavy menstrual bleeding) increased endometrial thickness, uterine polyps, intrauterine cavity fibroids, and/or miscarriage.**

I understand that the procedure or treatment can be described as follows:

**In an outpatient setting, a narrow lighted tube (hysteroscope) is inserted through the dilated cervix to view the inside of the uterus. In order to get a clear view, the uterus is inflated with carbon dioxide gas or fluid. The procedure routinely takes approximately 60 minutes.**

This procedure will require anesthesia which will be administered by a qualified anesthesiologist. Your anesthesiologist will be available to discuss this further with you on the day of your procedure.

**2 MY BENEFITS**

**Some potential benefits of this procedure include:**

- Removing tissue from the uterus may temporarily relieve abnormal bleeding lining; removing tissue for biopsy of the uterine lining; resolution of failed pregnancy.

While a Hysteroscopy is often an effective treatment for menorrhagia, biopsy of the uterine lining, endometrial thickness and/or miscarriage, not all conditions, diseases or problems of the uterus can be diagnosed or treated solely by a Hysteroscopy.

**3 MY RISKS**

*I understand that there are **potential risks, complications and side effects** associated with any surgical procedure. Although it is impossible to list all of them, I have been informed of some of the possible risks, complications and side effects of this procedure.*

**These could include but may not be limited to the following:**

- Infection, injury to surrounding organs, bleeding, failure to control heavy bleeding resulting in the need for further treatment of bleeding, hysterectomy, and repair of adjacent organs.

Some of these risks, complications and side effects are not serious or do not happen frequently. Although these risks, complications and side effects may occur only very rarely, they do sometimes occur and cannot be predicted or prevented by the physician performing the procedure.

**4 MY CONSENT**

Although most procedures have good results, I understand that **no guarantee** has been made to me about the results of this procedure or the occurrence of any risks, complications and side effects.

I recognize that during the course of treatment, unforeseeable conditions may require **additional treatment or procedures**.

I request and authorize my physician and other qualified medical personnel to perform such treatment or procedures **as required**.

I have chosen to undergo this procedure after considering the **alternative forms of diagnosis and/or treatment** for my condition including no treatment or other procedures or tests. Alternatives to this procedure may include, but are not limited to dilation and curettage (D&C), an ultrasound or other surgical treatments. These alternative forms of treatment have their own potential risks, benefits and possible complications.

**I certify that I have read or had read to me the contents of this form.**

I have read or had read to me and will follow any patient instructions related to this procedure.

I understand the potential risks, complications and side effects involved with the proposed **Hysteroscopy (operative)** and have decided to proceed after considering the possibility of both known and unknown risks, complications, side effects and alternatives.

I have had the opportunity to ask questions and all of my questions have been answered to my satisfaction. I consent to the above procedures as deemed necessary or appropriate by my physician or credentialed provider.
