

L.E.E.P. Consent Form

Patient Name: _____ Date of Birth: _____

Guardian Name (if applicable): _____ Patient ID: _____

Washington State law guarantees that you have both the right and the obligation to make decisions regarding your health care. Your physician can provide you with the necessary information and advice, but as a member of the health care team, you must participate in the decision making process. This form acknowledges your consent to treatment recommended by your physician.

1 MY PROCEDURE

I hereby give my consent for Dr. _____ or his/her associates to perform a **Loop Electrosurgical Excision Procedure (LEEP)** upon me. I understand the procedure is to be performed at First Hill Surgery Center. This has been recommended to me by my physician in order to **diagnose or treat cervical dysplasia (precancerous cells of the cervix).**

I understand that the procedure or treatment can be described as follows:

In an outpatient setting, a thin wire is heated with electricity and passed through the surface of the cervix to remove a layer of tissue. The procedure routinely takes approximately 10 minutes. The tissue is sent to pathology for microscopic evaluation.

General anesthesia or sedation may be required for this procedure and will be administered by a qualified anesthesiologist.

2 MY BENEFITS

Some potential benefits of this procedure include:

- Treatment of cervical dysplasia

While a LEEP is often an effective treatment for cervical dysplasia, not all conditions, diseases or problems of the cervix can be diagnosed or treated solely by a LEEP.

3 MY RISKS

*I understand that there are **potential risks, complications and side effects** associated with any surgical procedure. Although it is impossible to list all of them, I have been informed of some of the possible risks, complications and side effects of this procedure.*

These could include but may not be limited to the following:

- Scarring of the cervix, rarely could lead to a weakened cervix during pregnancy, infection, bleeding, incomplete removal of abnormal cells.

Some of these risks, complications and side effects are not serious or do not happen frequently. Although these risks, complications and side effects may occur only very rarely, they do sometimes occur and cannot be predicted or prevented by the physician performing the procedure.

4 MY CONSENT

Although most procedures have good results, I understand that **no guarantee** has been made to me about the results of this procedure or the occurrence of any risks, complications and side effects.

I recognize that during the course of treatment, unforeseeable conditions may require **additional treatment or procedures**.

I request and authorize my physician and other qualified medical personnel to perform such treatment or procedures **as required**.

I have chosen to undergo this procedure after considering the **alternative forms of diagnosis and/or treatment** for my condition including no treatment or other procedures or tests. Alternatives to this procedure may include, but are not limited to cold knife cone biopsy, in-office treatments, cryotherapy or observation. These alternative forms of treatment have their own potential risks, benefits and possible complications.

I certify that I have read or had read to me the contents of this form and will follow any patient instructions related to this procedure.

I understand the potential risks, complications and side effects involved with the proposed **LEEP** and have decided to proceed after considering the possibility of both known and unknown risks, complications, side effects and alternatives.

I have had the opportunity to ask questions and all of my questions have been answered to my satisfaction. I consent to the above procedures as deemed necessary or appropriate by my physician or credentialed provider.
